Discover

Different.

The problem

Everything we digest is hyper-personalized.

Algorithms understand our tastes and preferences more than ever. However, this limits our ability to explore new genres of music, art, design, etc. How can we create a space that challenges this tendency to hyper-personalize users' content, yet still create a curated and thoughtful experience?

How can we do this without creating a chaotic space, but an inviting one. One that encourages us to explore new areas of interest (particularly art and design focused), identifies blind spots, and challenges us to break outside of our echo chamber?

Pinterest
Pinterest's combination of personalized recommendations and visual search tools creates a user-centric discovery experience. However, its focus on aligning content with user preferences may contribute to the formation of echo chambers, limiting exposure to diverse ideas and styles. While curated sections like the "Today" tab provide some variety, the platform primarily reinforces existing interests.

Key Features
Pins and Boards, Explore, Personalized Home Feed, Collage

Google Arts & Culture
This app is somewhat designed to explore new art forms with features like virtual tours, "Art Transfer," and "Art Selfie," which introduce new artists and styles through interactive elements. However, it lacks the personalization and algorithmic transparency that might better challenge a user's usual preferences.

Key Features
Virtual Tours, Educational Content, Art Selfies

Dribbble
Dribbble offers a platform rich in features that facilitate the sharing and discovery of design work. Its curated sections and promotional tools aim to surface diverse content. However, the emphasis on user-driven content and the ability to promote specific works may lead to a focus on popular or trending designs, potentially limiting exposure to a broader range of styles and ideas.

Features
New and Noteworthy, Categories,

Behance
Behance provides a robust platform for creatives to display their work and discover others' projects. Its curated galleries and search functionalities offer structured pathways for exploration. However, the emphasis on curated content and similarity-based search may lead to the reinforcement of existing preferences, potentially limiting exposure to a broader range of styles and ideas.

Features
Curated Sections, Search & Tags, More Like This Visual Research

Areas of Opportunity

Content Horizon

Instead of only presenting highly personalized content, the app could allow users to set a “horizon” preference that controls the degree of personalization (from hyper-personalized to fully random).

Contrast Mode

This feature could contrast user favorites with visually or conceptually opposite art pieces. For example, a user interested in minimalism could be shown works from maximalism or baroque styles, creating unexpected visual insights.

Guided Learning Journeys

Unique, thematic collections of artworks or designs that teach something new, such as lesser-known art movements, techniques, or genres.

Algorithmic Transparency

Allowing users to “see” and “adjust” their recommendation algorithms could give users control over how much they want to engage with content outside of their preferences.

Educational “Blindspots”

This feature would highlight potential gaps in users interests and help widen their content horizon with an educational and tailored approach.

The solution

An art and design Platform that challenges users tastes and encourages them to expand their knowledge and interests.

Similar to pins and boards, it also allows them to conduct meaningful visual research.

A large, rounded rectangular button with a vibrant orange-red background. The text "Expand.io" is centered in a large, white, sans-serif font. Below it, the tagline "You don't know what you don't know (yet)" is written in a smaller, white, sans-serif font.

Expand.io

You don't know what you don't know (yet)

Who are our users?

User Needs

The primary need is broadening creative horizons in a structured, engaging, and approachable way.

- 1. Breaking Out of the Echo Chamber**
- 2. Serendipitous Inspiration**
- 3. Educational and Contextual Learning**
- 4. Personal Growth and Skill Development**
- 5. Customization and Control**
- 6. Engagement Without Overwhelm**
- 7. Accessible Across Skill Levels**

Cody

“The Hobbyist”

About

Age: 26

Occupation: Software Developer

Tech Proficiency: High

Influences

“I like finding inspiration in unexpected places. I want to see something new every time I open the app.”

Goals / Motivations

- Deepen his casual interest in art and learn about global artistic traditions.
- Discover inspiration for his photography and storytelling projects.
- Build a more meaningful connection to the arts without feeling overwhelmed.

Challenges

- Finds traditional platforms too saturated with content, making it hard to know where to start.
- Gets bored quickly if content feels repetitive or overly academic.

Mia

“The Professional”

About

Age: 34

Occupation: Freelance Illustrator

Tech Proficiency: Medium

Influences

“I want my work to be surprising
– not just to others, but to
myself. I need tools that’ll nudge
me into the unknown.”

Goals / Motivations

- Break free from her reliance on current trends in her work.
- Expand her knowledge of less familiar art forms (e.g., kinetic art, textile design).
- Improve her artistic versatility to attract diverse clients.

Challenges

- Feels stuck in a creative rut, drawing inspiration primarily from similar sources on platforms like Pinterest and Instagram.
- Lacks a structured way to discover new art styles or movements.
